REASONS FOR ALLOWANCE

Claims 1-15 are allowed. The following is an Examiner's statement of reasons for allowance:

Independent claim 1 of the present application teaches, for example, a method of designing low-density parity check codes, the method comprising the steps of: creating a pi-rotation parity check matrix having a first code rate; and concatenating a first matrix to the pi-rotation parity check matrix to increase the first code rate; and storing the concatenated first matrix and the pi-rotation matrix in a computer useable format. The foregoing limitations are not found in the prior arts of record. Particularly, none of the prior arts of record teach nor fairly suggest, "...concatenating a first matrix to the pi-rotation parity check matrix to increase the first code rate..."

Independent claim 11 includes similar limitations of independent claim 1 and therefore is allowed for similar reasons.

Dependent claims 2-10 and 12-15 depend from allowable independent claims and inherently include limitations therein and therefore are allowed as well.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mujtaba K. Chaudry whose telephone number is 571-272-3817.

The examiner can normally be reached on Mon-Fri 9-7:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jacques Louis-Jacques can be reached on 571-272-6962.
